

20 Abstract

25 The invention is based on a wiper system (10) for motor vehicles, in which at least one wiper arm (36) with a wiper blade (38) of a windshield wiper (12, 14) is placed in a parked position (26) parallel to a lateral boundary (40, 46) of a vehicle window (16).

It is provided that the wiper arm (36) with the wiper blade (38) in the parked position (26) is disposed between the vehicle window (16) and a cover trim (34, 48) extending at a spacing distance (56) from the window.
